Value Sensitive Design

Designers often focus on the **immediate context of use**: how will a product be used by the person who purchases it?

Designers rarely have the time to **consider the long-term and indirect effects of their technologies.**

WAZED AND CONFUSED

NJ TOWN TARGETS CONGESTION FROM NAVIGATION APPS

Indirect Stakeholders: The Waze Effect

WBZ-TV

Gail Barry of Medford says navigation apps have **completely changed her neighborhood**.

"The cars go whiz, whiz, whiz. It's like we are living on a highway. It's horrible."

Traffic on her residential street has gotten worse every year over the past couple of years.

<https://www.cbsnews.com/boston/news/iteam-waze-google-maps-traffic-navigation-apps-commuters/>

Photo by Evelyn Hockstein for The Washington Post

Tim Connor lives on a quiet residential street in Takoma Park, Maryland.

One afternoon, Connor **counted a vehicle every two seconds on a street with a single lane** available between parked cars.

One morning, neighbors **awoke to a cacophony of honks** and went out to find a **backup dozens of cars deep**, two drivers in the middle **about to come to blows**.

https://www.washingtonpost.com/local/traffic-weary-homeowners-and-waze-are-at-war-again-guess-whos-winning/2016/06/05/c466df46-299d-11e6-b989-4e5479715b54_story.html

Indirect Stakeholders: The Waze Effect

WBZ-TV

Gail Barry of Medford says navigation apps have **completely changed her neighborhood**

1. How could Waze update its design to account for its indirect stakeholders?
2. What could the indirect stakeholders do to fight back?

~3 mins: Discuss in Pairs.

Indirect Stakeholders: The Waze Effect

DAVID E. RYU
COUNCILMEMBER, FOURTH DISTRICT

April 17, 2018

City Attorney Mike Feuer
Office of the Los Angeles City Attorney
James K. Hahn City Hall East
200 North Main Street, 8th Floor
Los Angeles, CA 90012

Dear City Attorney,

I am writing you today to urge your office to explore filing suit against Waze, owned by Google LLC, a subsidiary of Alphabet, for creating a dangerous condition in the public right of way. After numerous attempts to reach a resolution with Waze for the threats to public safety and infrastructure caused by their mobile technology, it has become clear that any and all legal options should be considered.

Wayfinding technology such as Waze has grown increasingly popular with drivers. In 2015, Waze reported that it had about 2 million users in Greater Los Angeles, one of the app's most popular locations. This new kind of wayfinding technology promises users a faster commute by giving real-time traffic updates and alternate routes to traditional arteries. To achieve this, it can wreak undue havoc on traffic plans, residential communities, and the safety of the residents of Los Angeles. Ironically, many of these "short cuts", end up causing more traffic in a race-to-the-bottom effort to cut travel times by using small cut-through streets, leading drivers to make unsafe turns and often unpermitted traffic directions.

Indirect Stakeholders: The Waze Effect

"All roads are the public domain and therefore the right of everyone to use [...] In that sense, Waze redistributes traffic to create a better traffic situation for everyone."

– Uri Levine, Waze Co-Founder

Mashable

Manual chairs are far too expensive for those that need them to afford, so who knows how anyone who isn't a billionaire is supposed to afford these glorified (and ugly) segways?

2

2

6

I'd for sure fall out going up backwards. My core strength to hold myself upright is rubbish, no way I'd be able to do that. Also, going upstairs backwards in a crowd seems like it would be.... challenging at best

2

3

If it takes my HMO six weeks to approve new tires for my manual wheelchair, there isn't a chance in hell that they're approving one of these 'fancy' chairs

1

1

10

"What's the market price, what's the lifespan of the rubberized tracks, what's the maintenance model, what's the functionality of the chair if it stops working suddenly, what's the charge-cycle of the batteries, what's the lifespan of the batteries?"

"But it looks cool!"

1

5

Looks expensive. A simple ramp would be accessible to people who cannot afford this kind of tech as well as those with other mobility restrictions.

Resisting the Menace of Face Recognition

BY ADAM SCHWARTZ | OCTOBER 26, 2021

ESPAÑOL

Face recognition technology is a special menace to privacy, racial justice, free expression, and information security. Our faces are unique identifiers, and most of us expose them everywhere we go. And unlike our passwords and identification numbers, we can't get a new face. So, governments and businesses, often working in partnership, are increasingly using our faces to track our whereabouts, activities, and associations.

Face Recognition Settings

To recognize whether you're in a photo or video our system compares it with your profile picture, and photos and videos that you're tagged in. This lets us know when you're in other photos and videos so we can create better experiences. [Learn more.](#)

Face Recognition	Do you want Facebook to be able to recognize you in photos and videos?	No	Edit
------------------	--	----	------

But lots of open design questions:

- Does this setting control whether or not "face templates" are computed? Or only how they're used (e.g., automatic suggestions)?
- When should a "face template" be computed? When a photo is uploaded? Someone is tagged? Someone agrees to be tagged?
- If permission is revoked, should old "face templates" be deleted?

Choosing Not to Use: Face Recognition

The New York Times

Facebook to Pay \$550 Million to Settle Facial Recognition Suit

It was another black mark on the privacy record of the social network, which also reported its quarterly earnings.

An Update On Our Use of Face Recognition

November 2, 2021

By Jerome Pesenti, VP of Artificial Intelligence

- We're shutting down the Face Recognition system on Facebook. People who've opted in will no longer be automatically recognized in photos and videos and we will delete more than a billion people's individual facial recognition templates.
- This change will also impact Automatic Alt Text (AAT), which creates image descriptions for blind and visually-impaired people. After this change, AAT descriptions will no longer include the names of people recognized in photos but will function normally otherwise.
- We need to weigh the positive use cases for facial recognition against growing societal concerns, especially as regulators have yet to provide clear rules.

REVISED & EXPANDED EDITION

The DESIGN *of* EVERYDAY THINGS

DON
NORMAN

Designers are asked to figure out how to manage the interaction of technology and people. Good designers are quick learners, for today they might be asked to design a camera; tomorrow, to design a transportation system or a company's organizational structure. How can one person work across so many different domains? Because the fundamental principles of designing for people are the same across all domains. People are the same, and so the design principles are the same.

Designers are only one part of the complex chain of processes and different professions involved in producing a product. Although

SIX: *Design Thinking* 239

Photo from J. Nathan Matias (@natematias)

Software is *not neutral*

Software is *not neutral*

Developing software involves a series of **design choices and tradeoffs**, large and small.

Each design decision is **implicitly encoding your values and priorities**.

Through adoption, those values are then **applied at scale**.

Those design choices then begin to **shape our values**.
